Harita 17: Yüzeysel Su Kalitesi Senaryoları - TAKM (Sayfa 1 / 2)

Not 1: Temel Senaryo, 3 şeker fabrikası ve Suluoova Hayvansal Atık Tesislerinden yapılan endüstriyel atıksu deşarjları için 35 mg/l TAKM çıkış suyu standardı öngörmektedir.

Not 2: Modellenen TAKM senaryosu çıktıları üzerinde yapılan inceleme, TAKM konsantrasyonlarındaki aylık değişimleri vurgulamaktadır.

Not 3: Modellenen TAKM senaryosu çıktıları üzerinde yapılan inceleme, nüfusu 2000'den az küçük yerleşimlerden kaynaklanan kentsel atıksuların artılmasından kayda değer bir fayda sağlanmadığını teyit etmektedir.
